Chicago, Illinois 60628

Dear Mr. Rehor:

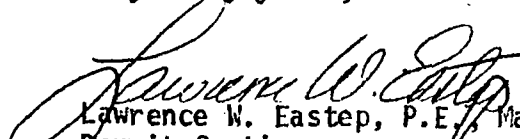

The subject hazardous waste management facility was inspected by a representative of this Agency on August 9, 1984. The inspection revealed that the closure activity was completed in accordance with the approved closure plan dated November 16, 1984.

Certification that the four treatment tanks in Building 515 used for the physical blending of waste solvent materials had been closed in accordance with the approved closure plan by the owner/operator, Donald T. Rehor, Sherwin Williams Company, and an independent registered professional engineer, Albert M. Cox, of Illinois was received at this Agency December 14, 1984.

The Agency has determined that the closure of the four treatment tanks in Building 515 has met the requirements of Interim Status Standards, 35 Ill. Admin. Code, Part 725 (40 CFR, Part 265).

This facility must continue to meet the requirements of 35 I.A.C. Subtitle G for those units identified on the Part A application not approved for closure herein.

Very truly yours,

  
Lawrence W. Eastep, P.E., Manager  
Permit Section  
Division of Land Pollution Control

☐ Response requested

ILD005456439

Subject facility submitted an after the fact closure plan to the Agency on 9/10/84. The plan was approved 11/16/84. The facility submitted the required certification of closure including the certification by a registered professional engineer to the Agency on 12/7/84.

During an ISS inspection at the facility on 8/9/84, I observed that the buildings containing the tanks had been demolished and the site graded. At the time of that inspection Mr. Fryzel explained the procedure which had been used to remove the waste in the tanks and the closure of this treatment operation.

I believe that all waste, the blending tanks and any contaminated debris has been removed from the site as described in the closure plan.

Attn: Mr. Lawrence W. Eastep, P.E. Manager

Dear Mr. Eastep:

In accordance with the provisions of 35 Illinois Administration Code 725.215, it is certified that the closure of the four treatment tanks as detailed in the closure plan submitted with our letter of September 10, 1984, has been completed and that the facility is now closed.

Certification of closure by a registered professional engineer, as required, is also attached.

Very truly yours,
